## How to install your ACR Presets

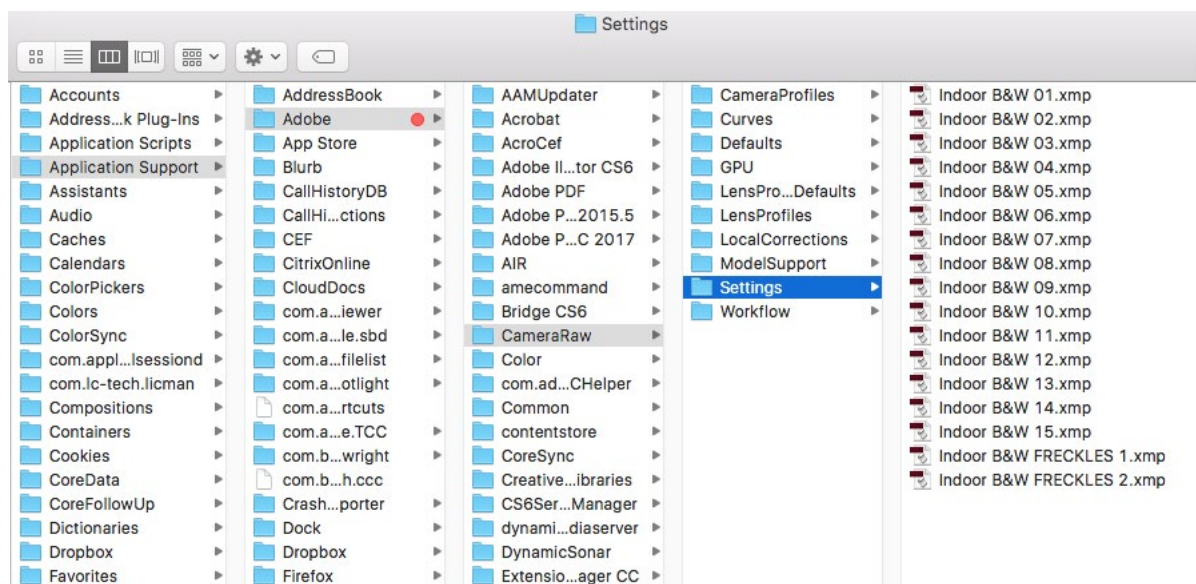

To install your presets, first download and unzip the files

Open the Preset Folder you just unzipped and copy all the .xmp files in the folder. These are the presets, you will need to go place them into the correct folder.

Go to your Finder(Mac) File Explorer (Windows) and open to following location:

Mac (user)/Library/Application Support/Adobe/Camera Raw /Settings

Win (user)/Application Data/Adobe/Camera Raw/Settings

Paste the .xmp files that copied earlier into the Settings folder.

Repeat the copy/paste process for the Tools and all your other preset sets you've purchased.

\*Make sure you did not copy the folder over, or it will not work. Only paste the .xmp files into the Settings Folder.
