Installing Your Lightroom Presets

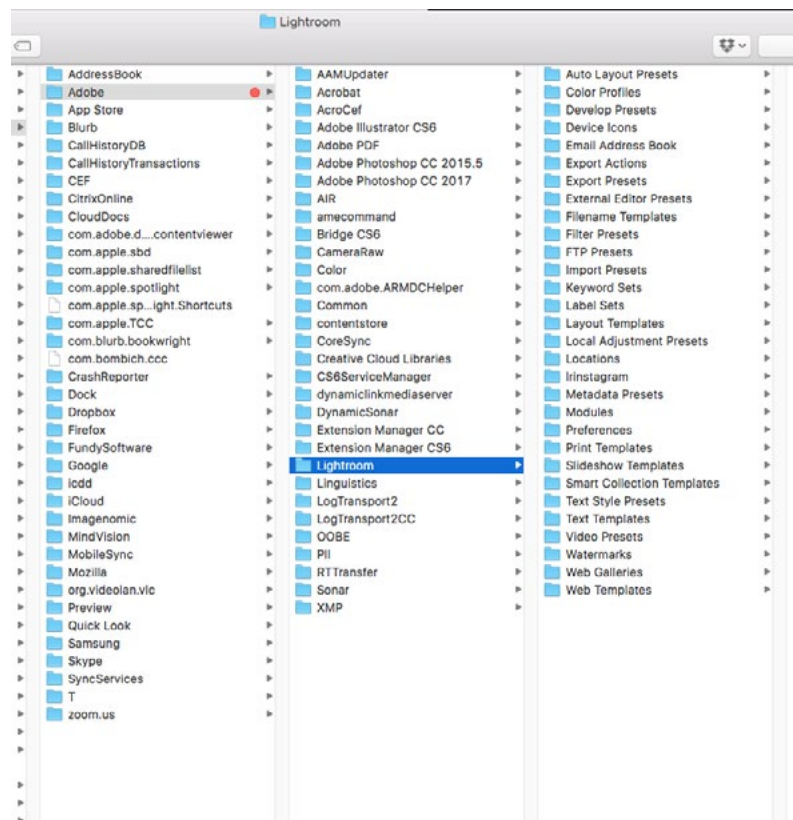

STEP 1: Open Lightroom, Click on “Preferences”

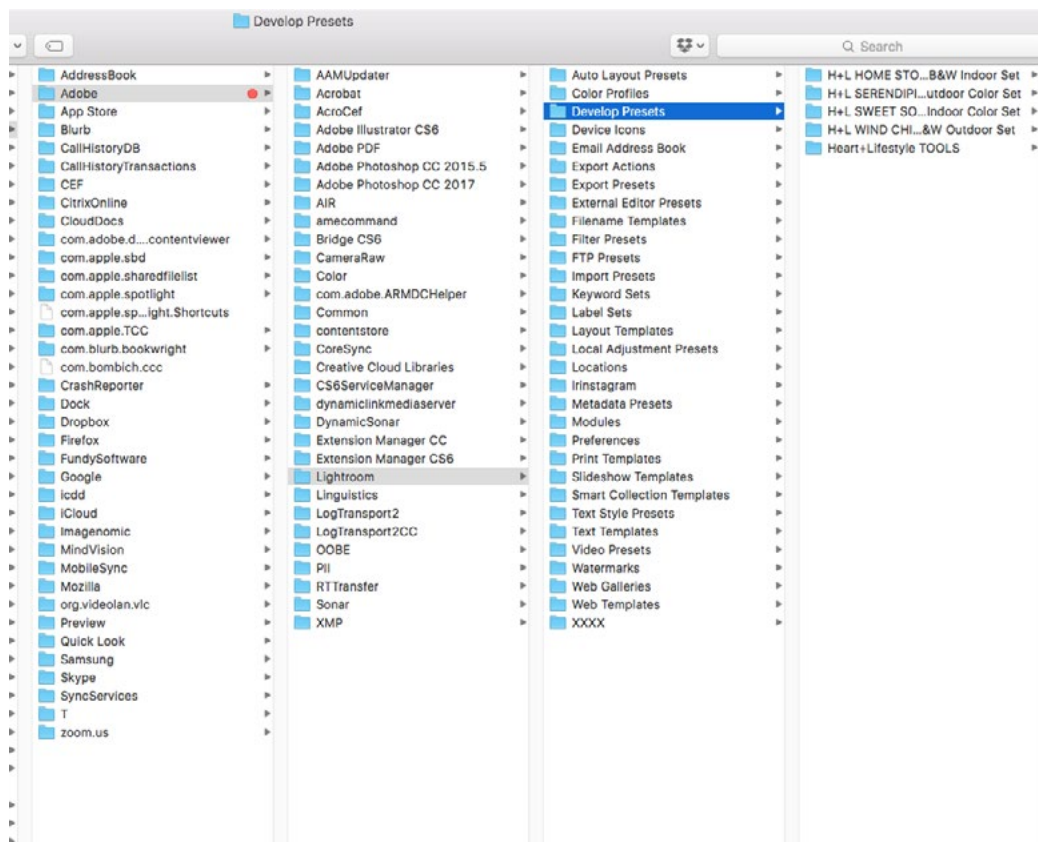

STEP 2: This screen will pop up. Click on “Show Lightroom Presets Folder”

STEP 3: This screen will pop open:

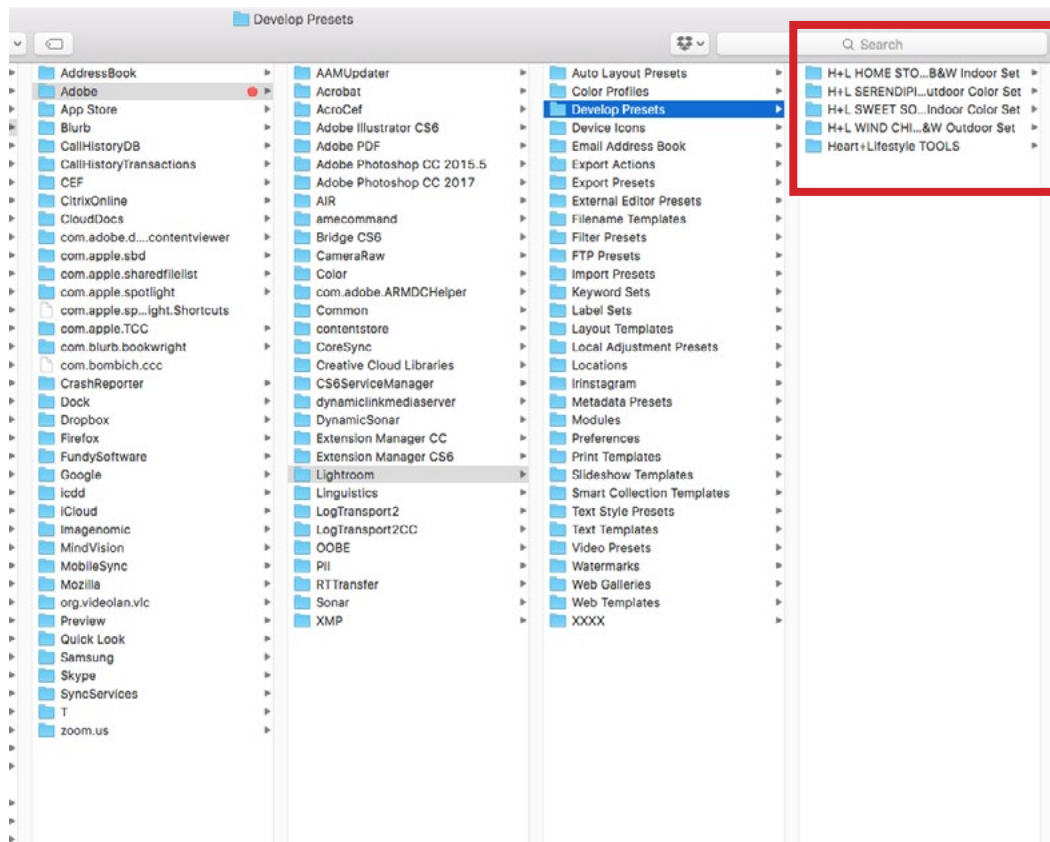

STEP 4: Click on “Develop Presets” in the Lightroom folder. THIS is where you need to put your files.

STEP 5: Go to your downloads and unzip your preset folder.

STEP 6: Copy the Preset Folders only (not the terms of use or instructions) and go paste these into the Develop Presets Folder.

STEP 7: Quit Lightroom and re-open it. Your presets should now appear in the Develop Module!
